

DAKSH is looking to hire for its research team

Responsibilities

- Research and writing on access to justice, the working of the justice system, technology, data and the impact of procedural and substantive law on the administration of courts.
- Collating, cleaning and analysis of data.
- Project management including managing external stakeholders and proactively tracking tasks and project deliverables.
- Developing high-quality knowledge products (reports, white papers, working papers) with research findings and disseminating such products to donors, partners and general public.
- Developing and implementing advocacy strategies.
- Cultivating relationships and building of networks with researchers, practitioners, policymakers and technology experts.
- Engaging in public discourse by publishing articles, blog posts, and op-eds.

Education and skills

- Undergraduate degree in law, any other post-graduate degree desirable
- At least five years of demonstrable work experience
- Strong research and writing skills
- Strong analytical skills and the ability to synthesise complex information into clear, actionable recommendations.
- Good interpersonal skills and ability to work collaboratively
- Willingness to travel
- Ability to work with strict deadlines
- Deep passion to make an impact in the field of judicial reforms
- Knowledge of Hindi or Kannada with verbal fluency – writing skills would be an advantage
- Prior working experience in legal practice or a research organisation would be an advantage

This will be a three-year engagement.

Location: Bangalore

Interested candidates may send their CV and a writing sample to careers@dakshindia.org

ABOUT DAKSH

DAKSH is a non-profit working on law and justice reforms since 2015. We have done original research that highlights ground realities and presents systemic reforms required in the law and justice system from a citizen's perspective. DAKSH works at the intersection of data science,

public policy and operations research. We are actively involved in creating sustainable solutions to improve judicial efficiency, process, administration and management.
